| <b>Fellowship Overview (300 words)</b>   | <p><b>Clinical Experience:</b> The program focuses on male reproductive and sexual health, emphasizing the medical and surgical management of male infertility, erectile dysfunction, Peyronie’s Disease, hypogonadism, and men’s health. Extensive operative experience is provided in microsurgical reconstruction, microvascular surgery, genital reconstruction and genitourinary prosthetics. The fellowship includes participation in genital reconstructive surgery and mentored, graduated experience in the management of men’s health disease. The fellow will have hospital staff privileges, a clinic of their own, the potential to schedule operative cases and contribute to the care of patients at the University of Washington Medical Center. A structured curriculum, weekly conferences, and close interaction with urology residents are provided.</p> <p><b>Faculty and Facilities:</b> All of the University of Washington Urology faculty who will directly participate in the fellow’s clinical training have sub-specialty expertise in andrology and/or reconstructive surgery, and have completed a well-respected fellowship program themselves (Drs. Thomas Walsh, Kevin A. Ostrowski, R. Dale McClure, John Amory, Charles Muller and Department Chairman Hunter Wessells).</p> |
