

Primary Institution	University of Texas McGovern Medical School and MD Anderson Cancer Center
Fellowship Director	Run Wang, MD, FACS Professor of Surgery (Urology) Cecil M. Crigler, MD, Chair in Urology Director of Sexual Medicine University of Texas McGovern Medical School and MD Anderson Cancer Center Houston, TX 77030 Past President, Sexual Medicine Society of North America Tel: 713-500-7337 Fax: 713-500-7319
Fellowship Administrator	Dorothy Stradinger, Dorothy.Stradinger@uth.tmc.edu
Candidate Citizenship Requirement	All Nationalities For non-US Citizen: ECFMG certificate is required
Fellowship Duration	12 months
Type of Fellowship	Sexual Medicine with some reproductive medicine exposure TMB Program ID: 503-48-14-74
Research Available	Clinical research is mandatory Laboratory research is optional
Fellowship Overview (300 words)	This Clinical Fellowship focuses on developing proficiency in the surgical and medical management of patients with sexual dysfunction. The fellow will be trained on the study and implementation of a) principles of risk factors, epidemiology, anatomy and physiology, b) diagnostic techniques, c) medical approaches to management and d) surgical approaches. Candidates are expected to acquire analytical abilities to critically evaluate peer reviewed research and understand the principles of scientific method, study design and protocol development. Specifically, the fellow will learn how to diagnose and treat erectile dysfunction, premature ejaculation, delayed ejaculation, Peyronie's disease, hypoactive sexual desire disorder (HSDD) in men, soft glans syndrome, anorgasmia, penile pain, post finasteride syndrome (PFS), androgen deficiency, and priapism with on and off label medications for ED. The emphasis for this fellowship will be on performing penile prosthesis implantation surgery, becoming proficient managing complex penile implantation cases, and learning penile reconstructive surgeries including surgeries for complex Peyronie's disease.

Research Focus (300 words)	The fellow is required to complete at least one clinical research project that is related to penile implantation/reconstructive surgery. The research must be presented at the SMSNA or AUA meeting and submitted for publication before graduation. Fellow will give half a day each week to conduct clinical research. The clinical research will focus on the best outcomes of penile implantation/reconstruction.
Surgical Procedures Performed	Electroejaculation Penile fracture repair Penile implant Penile plication Penile vibratory stimulation Percutaneous sperm extraction Plaque incision/excision and grafting Priapism shunting Varicocele ligation Vasectomy Vasectomy reversal
Office Procedures Performed	Cavernosometry/cavernosography Duplex Doppler Ultrasound Intracavernosal injections Intralesional injections Penile deformity assessment
Conference Schedule	Every Thursday morning, 7-9 am Every 3 rd and 4 th Thursday evening , 5-7pm
Fellowship Application (PDF/Link)	Please contact Dorothy Stradinger at dorothy.stradinger@uth.tmc.edu or Dr. Wang at run.wang@uth.tmc.edu , by email only.
Interview schedule (Free text)	By Invitation only.
Fellowship Website (Link)	N/A
Housing Options (Free Text)	Many housing options around Texas Medical Center
Prior Fellows & Contact Information (Free text)	Please contact dorothy.stradinger@uth.tmc.edu for prior fellow contact info.
